## **Abranet® Heavy Duty** – Aggressive, durable sanding for heavy duty applications

As you'd expect from a world leader in abrasives technology, Abranet HD is not your average sanding disc. It has been specifically developed to efficiently tackle the most demanding surface conditioning and repair applications. Abranet HD uses a nylon mesh backing material (in contrast to paper) to create a more flexible and more consistent abrasive surface. As a result, Abranet HD produces a more consistent surface finish more quickly and, because it also has excellent resistance to edge wear and clogging, it lasts longer, too.

Abranet HD is available in a variety of disc and sheet applications for extreme heavy duty applications in aerospace, composite, and automotive sectors. The exceptional edge wear and durability is ideal for situations where conventional abrasives fail.

Product range. Discs: 125mm, 150mm and 200mm

Rolls: 70mm x 10m and 115mm x 10m

### **TECHNICAL SPECIFICATIONS**

|                   |                               |
|-------------------|-------------------------------|
| <b>Grain</b>      | Special aluminium oxide grain |
| <b>Bonding</b>    | Resin over resin              |
| <b>Backing</b>    | Nylon Mesh                    |
| <b>Coating</b>    | Semi-open                     |
| <b>Color</b>      | Brown / white                 |
| <b>Grit range</b> | P 40, P 60, P80               |

## **effective solution to your sanding needs:**

Manufactured using Mirka's unique, environmentally friendly solvent-free coating system.

- Unique abrasive material resists clogging and delivers long lasting performance.
- Designed for optimum performance on both wet and dry sanding.
- Excellent durability – retains its high performance sanding properties for far longer, especially on harder applications. • Outstanding performance on demanding applications.
