

## BRONCO ACRYLIC EMULSION

### PRODUCT DESCRIPTION

Bronco Premium Acrylic Emulsion is a water-based emulsion polymer paint that dries to a clear, glossy finish that protects painted exterior and interior walls. It is also used as a sealer on concrete plasters when applied as first coat. It can also be used as a protective coating for walls on engineered stones, bricks, washouts and newly painted surfaces.

### SIZES AVAILABLE

1 Liter & 4 Liters

### SURFACE PREPARATION

Make sure that surface is clean, dry and free from dirt, dust and grease. Paint must be in sound condition free from flaking, efflorescence and peeling. Sand painted surfaces using #220 grit of sandpaper.

### APPLICATION

Apply using brush or roller. Best used for flat or semi-gloss paint. Test small area first at a corner if results are what is desired. Apply vertical strokes making sure that emulsion is not applied too thick and that it does not drip. You can apply second coat after 1 to 2 hours depending on weather conditions.

As protective coating on natural stones or cement walls, it is best to use a small brush on edges and crevices first. Use bigger brush on flat areas. It is best to apply 2 to 3 thin coats rather than 1 heavy coat as it will tend to drip or run. Wash painting materials with water.

### COVERAGE

20 - 25 sq.m. / 4 Liters / coat  
5 - 6 sq.m. / 1 Liter / coat
