

BRONCO WOOD GLUE

PRODUCT DESCRIPTION:

Bronco Wood Glue is a strong water based adhesive that bonds hard and soft woods, wood parquet, wood composites (particle board), flooring tiles and other porous materials. It is non toxic and solvent free. Cleans up easily with water.

USES:

Furniture, Parquet & Cabinets

DIRECTION FOR USE:

Make sure that pieces to be joined together fit snugly. Apply a liberal amount of wood glue. Rub the two pieces together to get an even distribution of glue. Apply moderate pressure or clamp for 20 – 30 minutes. For laminating, make sure surface is planed smooth, leaving no machine marks or tear outs. Apply glue to board surface evenly using plastic palette. Press together for 20 to 30 minutes using just enough pressure that some glue will bead out from the sides. Wipe any excess glue with a wet rag. Pieces can be handled without load in 3 to 4 hours. Wait for 24 hours for full cure.

Keep lid closed when not in use.

Coverage:

Use as required

Sizes Available:

1/2 Kilo, 1 Kilo & 4 Kilos
