

## **PRIMERO AGENT M25 PLASTER MASTER**

### **PRODUCT DESCRIPTION**

Plaster Master is an acrylic based additive to improve the bonding and workability of sand plaster mix or pure cement "puro". It increases bonding strength thus reducing segregation "kapak". It also improves flexural strength thereby reducing shrinkage which eliminates hairline or spider cracks on walls.

### **USES**

Additive for plastering works.

### **SIZE AVAILABLE**

4 liters

### **BENEFITS**

- Longer pot life
- Easier workability
- Better adhesion
- Reduces segregation
- Eliminates hairline and spider cracks

### **MIXING**

Shake well before using.

### **CEMENT/SAND SCREED**

Dry mix 1 part of cement to 3 parts sand, add clean water and mix well to make a thick paste. Add 500ml of Plaster Master for every 40kg bag of cement. Mix well preferably using an electric drill. This will spread the additive well to the mix to give better results. Apply using flat broad rectangular trowel using upward strokes.

### **PRECAUTIONS**

- Do not take internally.
- Keep out of reach of children.
- Store in room temperature.
- Keep away from direct sunlight and sources of heat.
- Keep container closed when not in use.
